

The logo features the text "K&Co" in a white, serif typeface, centered within a dark green circle. This circle is set against a light gray square background, which is itself centered on a white page. The overall design is clean and minimalist.

K&Co

LEATHER / TANNING

INDUSTRY SALT

A high-purity, industrial-grade salt specially processed for the leather industry. Its consistent granulation and low moisture content make it ideal for curing hides, preserving raw skins, and preventing bacterial growth during the tanning process. Widely used in tanneries and leather manufacturing for high-quality hide preservation.

Available in multiple grades
to meet various tanning
and curing requirements

MEDICAL / PHARMACEUTICAL INDUSTRY SALT

A high-purity, pharmaceutical-grade salt, carefully processed to meet stringent medical and laboratory standards. Its low moisture, minimal impurities, and consistent granulation make it suitable for a wide range of medical applications including saline solutions, IV fluids, pharmaceutical formulations, and research purposes.

Available Forms

Fine | Powder | Granular

(or as per customer requirements)

Key Benefits

- Ultra-high purity and minimal impurities for safe medical use
- Consistent granulation for precise formulation and dosing
- Chemically stable and free from contaminants
- Suitable for pharmaceutical, laboratory, and healthcare applications
- Complies with international pharmacopeia standards

DESULFURIZATION **SALT**

A high-purity, industrial-grade salt designed for flue gas desulfurization (FGD) and other chemical processes. With consistent granulation and minimal impurities, it ensures efficient sulfur removal, protects equipment, and supports compliance with environmental standards.

Key Benefits

- High sodium chloride content for efficient sulfur absorption
- Low moisture and insoluble content for reliable industrial performance
- Consistent granulation ensures smooth processing in scrubbers and reactors
- Helps industries meet environmental regulations and reduce emissions
- Suitable for thermal power plants, chemical industries, and large-scale desulfurization systems

DE-ICING SALT

A high-purity industrial salt specially processed for efficient ice and snow melting. Its consistent granulation and high sodium chloride content ensure rapid melting, improved traction, and safe surfaces in winter conditions. Widely used by municipal authorities, airports, and industrial facilities.

Key Benefits

- High sodium chloride content for rapid ice melting
- Low moisture and impurities for reliable performance
- Uniform granulation for even spreading and reduced wastage
- Helps maintain safe roads, runways, and industrial surfaces
- Suitable for municipal, commercial, and industrial de-icing applications
- Available as per customer requirements

Textile/Dyeing Salt

A high-purity, industrial-grade salt formulated for use in textile manufacturing and dyeing processes. It ensures uniform color development, reduces streaking, and improves dye fixation on fabrics. Widely used in textile mills, garment factories, and industrial dyeing units.

Key Benefits

- High sodium chloride content for effective dye fixation
- Low moisture and insoluble matter for consistent results
- Enhances uniformity and color quality of fabrics
- Reduces fabric defects and dye wastage
- Suitable for cotton, wool, synthetic fibers, and blended fabrics
- **Available as per customer requirements**

Detergent Industry Salt

A high-purity, industrial-grade salt specially processed for the detergent and cleaning industry. Its consistent granulation, low moisture, and minimal insoluble content ensure uniform mixing, high solubility, and enhanced cleaning performance in both powdered and liquid detergents.

Key Benefits

- High sodium chloride content for effective detergent formulations
- Low moisture and insoluble matter for consistent mixing and performance
- Ensures uniform solubility and prevents clumping in detergent powders
- Enhances cleaning efficiency and product quality
- Suitable for both household and industrial detergent production
- Available as per customer requirements

Our Packing Material & Standards

- 1-Ton Jumbo Bags
- 50 kg PP Bags
- 25 kg Bags
- Custom Printing & Branding Available

Custom packaging and private labeling available upon request.

Logistics & Delivery

- FOB Karachi
- CIF worldwide available
- Palletizing available
- **Loading Capacity:** 26–28 tons per 20 ft container/
- 40ft containers are also available
